Aidan McBride

732-606-6416| aidankmcbride@gmail.com | GitHub |Blogs | LinkedIn

I have been in customer service since I was fifteen years old and have gained a general understanding and compassion for people. From being head presenter in my Public Speaking class final in college, to building greenhouses and fixing plumbing and sprinkler structures, working with my hands and communication have always been the key aspects in my employment. Recently I had the wonderful opportunity to experience a Software Engineering bootcamp where I learned more in fifteen weeks than I could have ever expected to. I strive to not only continue my pursuit of human interaction on a daily basis, but also expand my horizons with hands on experience.

PROGRAMMING LANGUAGES / SOFTWARE
Active Record; Angular; Back-end Dev; Bootstrap; CSS; Design; ES6; Express.js; Firebase; Full-stack Development; Front-end Development; Git; Github; HTML; JavaScript; Mailgun; Next.js; Node.js; OAuth; PostgresSQL; Python; React.js; Redux.js; Ruby; Ruby on Rails;   Semantic-UI/ Semantic-UI-React; Sinatra; Software Development; SQL; SQLite; Trello; Version Control; Webpack; Web Development; Web Applications;

TECHNICAL PROJECTS
Backyard Garden - GitHub FE | GitHub BE | Demo
Track the growth of the crops in your garden, share pictures and posts, and see weather updates
- Manages related data through complex forms and RESTful routes
- Utilizes serialization to convert multiple API's info to JSON
- User validation errors with frontend and back end authentication

SketchUp - GitHub FE | GitHub BE | Demo
Upload and edit or draw your own pictures to save and share with friends
- Utilizes Active Storage blob to both upload and download pictures to and from a local machine
- Uses an outside library 'react-konva' to generate a Sketch Pad that can be edited and saved
- Ruby on Rails backend API, React Frontend, Semantic-UI and Bootstrap styling

Today'sMeal - GitHub | Demo | App
Look up new recipes from other users or upload your own
- Uses Ruby on Rails and html.erb views
- Uses backend session authentication and renders frontend error messages
